

# Darlinghurst Academy Year 3 Summer 1: The Games Children Play

## Vocabulary

Friction	the resistance of motion when there is contact between two surfaces
force	the pulling or pushing effect that something has on something else

## My favourite thing when I was a child

I found a brick a month ago  
 And at the time I did not know  
 How fine a treasure it would be  
 And how much pleasure give to me.  
 I use my brick to prop my feet,  
 To dam the gutter on our street,  
 To hold and trick the bathroom scales,  
 To cover holes, and hammer nails.  
 My brick's a barbell in my hand,  
 A tower in my fort of sand,  
 A wall for tiny cars to crash,  
 A bomb to make the puddles splash.  
 A step to climb atop a chair,  
 A pillow for my teddy bear,  
 A hurdle when I roller skate,  
 A bookend and a paperweight.

## Children's Games by Peter Bruegel

**Some surfaces create more friction than others which means that objects move across them slower.**
